

MINHAJ SHAMEER AHAMED

IT ADMINISTRATOR | JUNIOR VAPT ANALYST

Abu Dhabi, United Arab Emirates

[Email](#) • [LinkedIn](#) • [Portfolio](#) • [TryHackMe](#) • [GitHub](#)

PROFESSIONAL SUMMARY

IT Operations Support Assistant and Cybersecurity Engineer with hands-on experience in technical support, endpoint deployment, troubleshooting, networking, and cybersecurity operations. Skilled in Windows administration, Active Directory, Microsoft 365, endpoint management, VAPT, and security tools including Burp Suite, Wireshark, Nmap, and Nessus. First-Class Honours graduate in Cyber Security Engineering with practical experience in OWASP Top 10 testing, Linux, Active Directory security, penetration testing, and technical reporting. Currently pursuing CompTIA Security+ while developing expertise in SIEM, incident response, cloud security, and blue team operations.

WORK EXPERIENCE

Administrator Assistant (IT Support) | Part-time – Abu Dhabi University

Abu Dhabi, UAE | Jul 2026 - Present

- Deliver Tier 1 and Tier 2 IT support across endpoint, network, identity, Microsoft 365, and smart classroom environments.
- Support endpoint lifecycle operations including Windows deployment, system imaging, patching, secure configuration, domain integration, and workstation provisioning.
- Provide Microsoft 365 and identity support across Outlook, Teams, OneDrive, account access, password reset workflows, and Microsoft Entra ID requests.
- Troubleshoot hardware, software, network connectivity, peripherals, AV systems, and classroom technology issues through helpdesk channels.
- Support auditorium and control room operations, including presentation systems, cameras, microphones, connectivity, and event technology.

IT Support Intern | DATA Department – Abu Dhabi University

Abu Dhabi, UAE | Apr 2026 - Jul 2026

- Provided Tier 1 IT support for hardware, software, network connectivity, Microsoft 365, and smart classroom incidents.
- Deployed and configured Windows endpoints, applications, system images, and workstations for student laboratories and staff environments.
- Assisted with endpoint lifecycle management, hardware configuration, software deployment, patching, and domain integration.
- Supported Outlook, Teams, OneDrive, account access, device onboarding, and basic identity and access management activities.
- Provided technical support for computer laboratories, assessments, classroom AV systems, and helpdesk incidents.

Red Team Intern | Junior Penetration Testing - Cyber50 Defense

Abu Dhabi, UAE | Apr 2026 - Jun 2026

- Executed VAPT engagements across web applications, internal networks, and Android applications within client environments.
- Conducted Linux privilege escalation and post-exploitation activities to validate security impact following successful exploitation.
- Identified and validated critical vulnerabilities, including SQL Injection, authentication flaws, and insecure input validation.
- Produced comprehensive penetration testing reports with CVSS risk ratings, technical findings, executive summaries, and remediation recommendations.
- Collaborated with senior security consultants to execute real-world security assessments and validate remediation strategies.

Penetration Tester Intern - RedTeam Hacker Academy
Dubai, UAE | Dec 2025 - Mar 2026

- Executed VAPT assessments following industry-standard penetration testing methodologies.
- Performed reconnaissance, enumeration, and vulnerability assessments using Nmap, Gobuster, Wireshark, Burp Suite, and Linux tools.
- Assessed web applications for OWASP Top 10 vulnerabilities, including SQL Injection, Cross-Site Scripting (XSS), Broken Access Control, and Authentication flaws.
- Documented technical findings and produced penetration testing reports with remediation recommendations.
- Executed red team lab exercises and simulated attack scenarios to emulate real-world adversary techniques.

EDUCATION

Bachelor of Science (Hons) Cyber Security Engineering

University of West London, RAK | Oct 2022 - Jul 2025

- Classification: First-Class Honours
- Final Year Project: MetaWarden – Metadata Detection & Removal using Flask
- Key Modules: Cybersecurity, Web Security, Digital Forensics, Networking, Cryptography, ML, Threat Analysis

SKILLS

- **Offensive Security:** VAPT, Web Security Testing, Network Penetration Testing, Active Directory Attacks
- **Defensive Security:** SIEM Monitoring, Log Analysis, Security Hardening, Threat Detection, Endpoint Security
- **IT Infrastructure & Support:** Endpoint Deployment, OS Imaging, Hardware Troubleshooting, Tier 1 & 2 Support
- **Programming:** Python, Bash, SQL, PowerShell (Basic)
- **Tools:** Nmap, Burp Suite, Metasploit, Nessus, Wireshark, Hydra, BloodHound, Mimikatz, OpenVAS
- **Frameworks:** OWASP Top 10, NIST CSF, NIST SP 800-30, ISO 27001

PROJECTS

- **VAPT Multi-Domain Security Assessment** – RedTeam Hacker Academy
- **MetaWarden**: Metadata Detection & Privacy Risk Analysis Tool – Final Year Project
- **EmailSleuth**: Email Phishing Analyzer & Forensics Tool
- **AWASP**: Automated Web Vulnerability Assessment Pipeline
- **VulnQueue** : Vulnerability Management Dashboard
- Hands-on Penetration Testing Lab (HackTheBox, TryHackMe, VulHub, PortSwigger)

CERTIFICATIONS

- Enterprise Defense Administrator (eEDA) – INE Security
- Security Operation Center (SOC) in Practice – IBM
- CompTIA Security+ (Training)
- ISO/IEC 27001, 27701 & 42001 Lead Auditor – Mastermind
- Advanced Penetration Tester (APT) – RedTeam Hacker Academy
- Threat Intelligence & Hunting – IBM
- Certified API Hacking Expert (CAPIE) – The XSS Rat Security
- Penetration Testing Professional Certificate – Cybrary

ADDITIONAL INFORMATION

Languages: English (Fluent), Malayalam (Native), Hindi (Basic), Tamil (Proficient), Arabic (Elementary).
