PROFESSIONAL SUMMARY

IT Support and Cybersecurity Engineer with hands-on experience in Tier 1/Tier 2 technical support, endpoint deployment, hardware and software troubleshooting, smart classroom technologies, and cybersecurity operations gained through internships at Abu Dhabi University. Skilled in Windows administration, networking, Active Directory, endpoint management, and security tools including Burp Suite, Wireshark, Nmap, and Nessus. Developed security-focused projects including MetaWarden (metadata privacy tool), as part of a First-Class Honours BSc (Hons) Cyber Security Engineering degree from the University of West London. Strong knowledge of OWASP Top 10, Active Directory security, endpoint hardening, Linux environments, and defensive security practices. Currently pursuing CompTIA Security+ while strengthening skills in SIEM operations, incident response, cloud security, and blue team defense.

WORK EXPERIENCE

IT Support Administrator Intern – Abu Dhabi University

Abu Dhabi, UAE | Apr 2026 - Present

- Provide Tier 1 and Tier 2 technical support to faculty, staff, and students by diagnosing and resolving hardware, software, network, and smart classroom technology issues.
- Install, configure, and maintain desktops, laptops, printers, scanners, video conferencing systems, and laboratory equipment to ensure reliable IT service delivery and minimal operational downtime.
- Deploy Windows operating systems, install software, configure applications and licenses, troubleshoot login and password issues, and prepare endpoint devices in accordance with university IT and cybersecurity standards.
- Provide basic network support by troubleshooting Wi-Fi, internet, and LAN connectivity issues, ensuring continuous access to university services.
- Create and deploy standardized system images, perform OS reinstallation, endpoint provisioning, patch management, and device decommissioning to support secure endpoint lifecycle management.
- Assist with server backup operations, preventive maintenance, and IT infrastructure support to enhance system availability, data integrity, and organizational security.
- Support computer laboratories and online examinations by preparing systems, providing technical assistance during assessments, and ensuring uninterrupted academic operations.

Red Team Intern - Cyber50 Defense

Abu Dhabi, UAE | Apr 2026 - Jun 2026

- Executed VAPT engagements across web applications, internal networks, and Android applications within client environments.
- Conducted Linux privilege escalation and post-exploitation activities to validate security impact following successful exploitation.
- Identified and validated critical vulnerabilities, including SQL Injection, authentication flaws, and insecure input validation.
- Produced comprehensive penetration testing reports with CVSS risk ratings, technical findings, executive summaries, and remediation recommendations.
- Collaborated with senior security consultants to execute real-world security assessments and validate remediation strategies.

Penetration Tester Intern - RedTeam Hacker Academy

Dubai, UAE | Dec 2025 - Mar 2026

- Executed VAPT assessments following industry-standard penetration testing methodologies.
- Performed reconnaissance, enumeration, and vulnerability assessments using Nmap, Gobuster, Wireshark, Burp Suite, and Linux tools.
- Assessed web applications for OWASP Top 10 vulnerabilities, including SQL Injection, Cross-Site Scripting (XSS), Broken Access Control, and Authentication flaws.
- Documented technical findings and produced penetration testing reports with remediation recommendations.
- Executed red team lab exercises and simulated attack scenarios to emulate real-world adversary techniques.

EDUCATION

Bachelor of Science (Hons) Cyber Security Engineering

University of West London, RAK | Oct 2022 - Jul 2025

- Classification: First-Class Honours
- Final Year Project: MetaWarden – Metadata Detection & Removal using Flask
- Key Modules: Cybersecurity, Web Security, Digital Forensics, Networking, Cryptography, ML, Threat Analysis

SKILLS

- **Offensive Security:** VAPT, Web Security Testing, Network Penetration Testing, Active Directory Attacks
- **Defensive Security:** SIEM Monitoring, Log Analysis, Security Hardening, Threat Detection, Endpoint Security
- **IT Infrastructure & Support:** Endpoint Deployment, OS Imaging, Hardware Troubleshooting, Tier 1 & Tier 2 Support
- **Programming:** Python, Bash, SQL, PowerShell (Basic)
- **Tools:** Nmap, Burp Suite, Metasploit, Nessus, Wireshark, Hydra, BloodHound, CrackMapExec, Mimikatz, OpenVAS
- **Frameworks:** OWASP Top 10, NIST CSF, NIST SP 800-30, ISO 27001

PROJECTS

- VAPT Multi-Domain Security Assessment – RedTeam Hacker Academy – [GitHub](#)
- **MetaWarden:** Metadata Detection & Privacy Risk Analysis Tool – Final Year Project – [GitHub](#)
- **SignalForge:** OT SOC Triage & Threat Detection Assistant – [GitHub](#)
- **LogSentry:** Security Log Analysis & Alerting Tool – [GitHub](#)
- **EmailSleuth:** Email Phishing Analyzer & Forensics Tool – [GitHub](#)
- Hands-on Penetration Testing Lab (HackTheBox, [TryHackMe](#), VulHub, PortSwigger)

CERTIFICATIONS

- Enterprise Defense Administrator (eEDA) – [INE Security](#)
- Security Operation Center (SOC) in Practice – [IBM](#)
- CompTIA Security+ (Training)
- ISO/IEC 27001, 27701 & 42001 Lead Auditor – [Mastermind](#)
- Advanced Penetration Tester (APT) – [RedTeam Hacker Academy](#)
- Threat Intelligence & Hunting – [IBM](#)
- Certified API Hacking Expert (CAPIE) – [The XSS Rat Security](#)
- Penetration Testing Professional Certificate – [Cybrary](#)

ADDITIONAL INFORMATION

Languages: English (Fluent), Malayalam (Native), Hindi (Basic), Tamil (Proficient), Arabic (Elementary).
