PROFESSIONAL SUMMARY

Cybersecurity Analyst with experience in Vulnerability Assessment and Penetration Testing (VAPT), SOC operations, web application security, and IT infrastructure support through internships and cybersecurity projects. Skilled in using Burp Suite, Metasploit, Nmap, Nessus, Wireshark, and Python/Bash scripting for security testing, threat analysis, and automation. Developed MetaWarden, a Flask-based metadata privacy risk analysis tool, as part of a First-Class Honours BSc (Hons) Cyber Security degree from the University of West London. Familiar with OWASP Top 10, Active Directory security, endpoint hardening, and Linux environments. Currently pursuing CompTIA Security+ while strengthening skills in SIEM operations, incident response, and cloud security.

WORK EXPERIENCE

IT Infrastructure & Security Intern – Abu Dhabi University

Abu Dhabi & Al Ain, UAE | Apr 2026 - Present

- Provide Tier 1 and Tier 2 technical support for hardware, software, network, and smart classroom technology systems
- Configure, patch, harden, and deploy laptops, desktop systems, and endpoint devices following organizational IT security standards
- Create and deploy standardized system images for rapid and consistent endpoint provisioning across academic departments
- Diagnose and resolve hardware-related issues through component-level troubleshooting and device maintenance procedures
- Assist with IT infrastructure and cybersecurity operations including OS reinstallation, endpoint preparation, and decommissioning
- Support secure IT service delivery across Abu Dhabi and Al Ain campuses while gaining exposure to infrastructure operations

Freelance Penetration Tester (VAPT)

United Arab Emirates | Apr 2025 - Present

- Conduct independent penetration testing engagements on web applications, internal networks, and organizational systems
- Perform reconnaissance, vulnerability scanning, and security assessments using Nmap, Nessus, Metasploit, Burp Suite
- Identify and analyze security weaknesses including misconfigurations, authentication flaws, and application vulnerabilities
- Validate discovered vulnerabilities through controlled exploitation to demonstrate realistic attack impact
- Prepare comprehensive penetration testing reports including risk ratings and remediation recommendations
- Deliver security assessments and remediation re-testing services for organizations across the UAE

Penetration Testing (VAPT) Intern - RedTeam Hacker Academy

Dubai, UAE | Dec 2025 - Mar 2026

- Executed VAPT engagements on web applications, internal networks, and Android mobile applications
- Conducted reconnaissance and service enumeration using Nmap, Gobuster, WhatWeb, and Burp Suite
- Identified vulnerabilities including SQL Injection, authentication flaws, and input validation weaknesses
- Exploited Linux server vulnerabilities to achieve privilege escalation and root-level system access
- Produced penetration testing reports with CVSS risk ratings and remediation recommendations

Full Stack Web Development Intern – TCR Innovation

Mumbai, India | Jun 2023 - Oct 2023

- Developed websites using HTML and CSS, ensuring responsive and user-friendly interfaces.
- Collaborated with team members on web development projects, contributing to design and functionality improvements.

EDUCATION

Bachelor of Science (Hons) Cyber Security Engineering

University of West London, RAK | Oct 2022 - Jul 2025

- Classification: First-Class Honours
- Final Year Project: MetaWarden – Metadata Detection & Removal using Flask
- Key Modules: Cybersecurity, Web Security, Digital Forensics, Networking, Cryptography, ML, Threat Analysis

SKILLS

- **Offensive Security:** VAPT, Web Security Testing, Network Penetration Testing, Active Directory Attacks
- **Defensive Security:** SIEM Monitoring, Log Analysis, Security Hardening, Threat Detection, Endpoint Security
- **IT Infrastructure & Support:** Endpoint Deployment, OS Imaging, Hardware Troubleshooting, Tier 1 & Tier 2 Support
- **Programming:** Python, Bash, SQL, PowerShell (Basic)
- **Tools:** Nmap, Burp Suite, Metasploit, Nessus, Wireshark, Hydra, BloodHound, CrackMapExec, Mimikatz, OpenVAS
- **Frameworks:** OWASP Top 10, NIST CSF, NIST SP 800-30, ISO 27001

PROJECTS

- VAPT Multi-Domain Security Assessment – RedTeam Hacker Academy – [GitHub](#)
- **MetaWarden:** Metadata Detection & Privacy Risk Analysis Tool – Final Year Project – [GitHub](#)
- **SignalForge:** OT SOC Triage & Threat Detection Assistant – [GitHub](#)
- **LogSentry:** Security Log Analysis & Alerting Tool – [GitHub](#)
- **EmailSleuth:** Email Phishing Analyzer & Forensics Tool – [GitHub](#)
- Hands-on Penetration Testing Lab (HackTheBox, [TryHackMe](#), VulHub, PortSwigger)

CERTIFICATIONS

- Enterprise Defense Administrator (eEDA) – [INE Security](#)
- Security Operation Center (SOC) in Practice – [IBM](#)
- CompTIA Security+ (Training)
- ISO/IEC 27001 & 42001 Lead Auditor – [Mastermind](#)
- Advanced Penetration Tester (APT) – [RedTeam Hacker Academy](#)
- Threat Intelligence & Hunting – [IBM](#)
- Certified API Hacking Expert (CAPIE) – [The XSS Rat Security](#)
- Penetration Testing Professional Certificate – [Cybrary](#)

ADDITIONAL INFORMATION

Languages: English (Fluent), Malayalam (Native), Hindi (Basic), Tamil (Proficient), Arabic (Elementary).

Licenses: LMV Driving License

Availability: Immediate Joiner
